

Federal Training and Technical Assistance Centers

Thursday, August 17, 2023

SchoolSafety.gov

Webinar Agenda

- Webinar Objectives
- Speaker Introductions
- Department of Education Centers:
 - National Center on Safe Supportive Learning Environments (NCSSLE)
 - Readiness and Emergency Management for Schools (REMS)
 - Positive Behavioral Interventions & Supports (PBIS)
- National Center for School Safety (NCSS)
- Center of Excellence on Social Media and Youth Mental Health
- Federal School Safety Clearinghouse
- Q & A

SchoolSafety.gov

Webinar Objectives

1. Provide an overview of Federal Training and Technical Centers, their offerings, and how they support members of the K-12 community.
2. Specifically focus on information related to school safety, school climate, and student mental health supports.

OFFICE OF SAFE AND
SUPPORTIVE SCHOOLS

AMY BANKS

The Office of Safe and Supportive Schools (OSSS)

OSSS is within the Office of Elementary and Secondary Education

OSSS addresses:

-
- **The health and well-being of students**
 - **School safety, security, emergency management, and preparedness**
 - **OSSS administers, coordinates, and recommends policy**
 - **Administers grant programs and technical assistance centers addressing the overall safety and health of the school community**

Today's spotlight:

Three OSSS Technical
Assistance (TA) Centers

NCSSLE, REMS, & PBIS

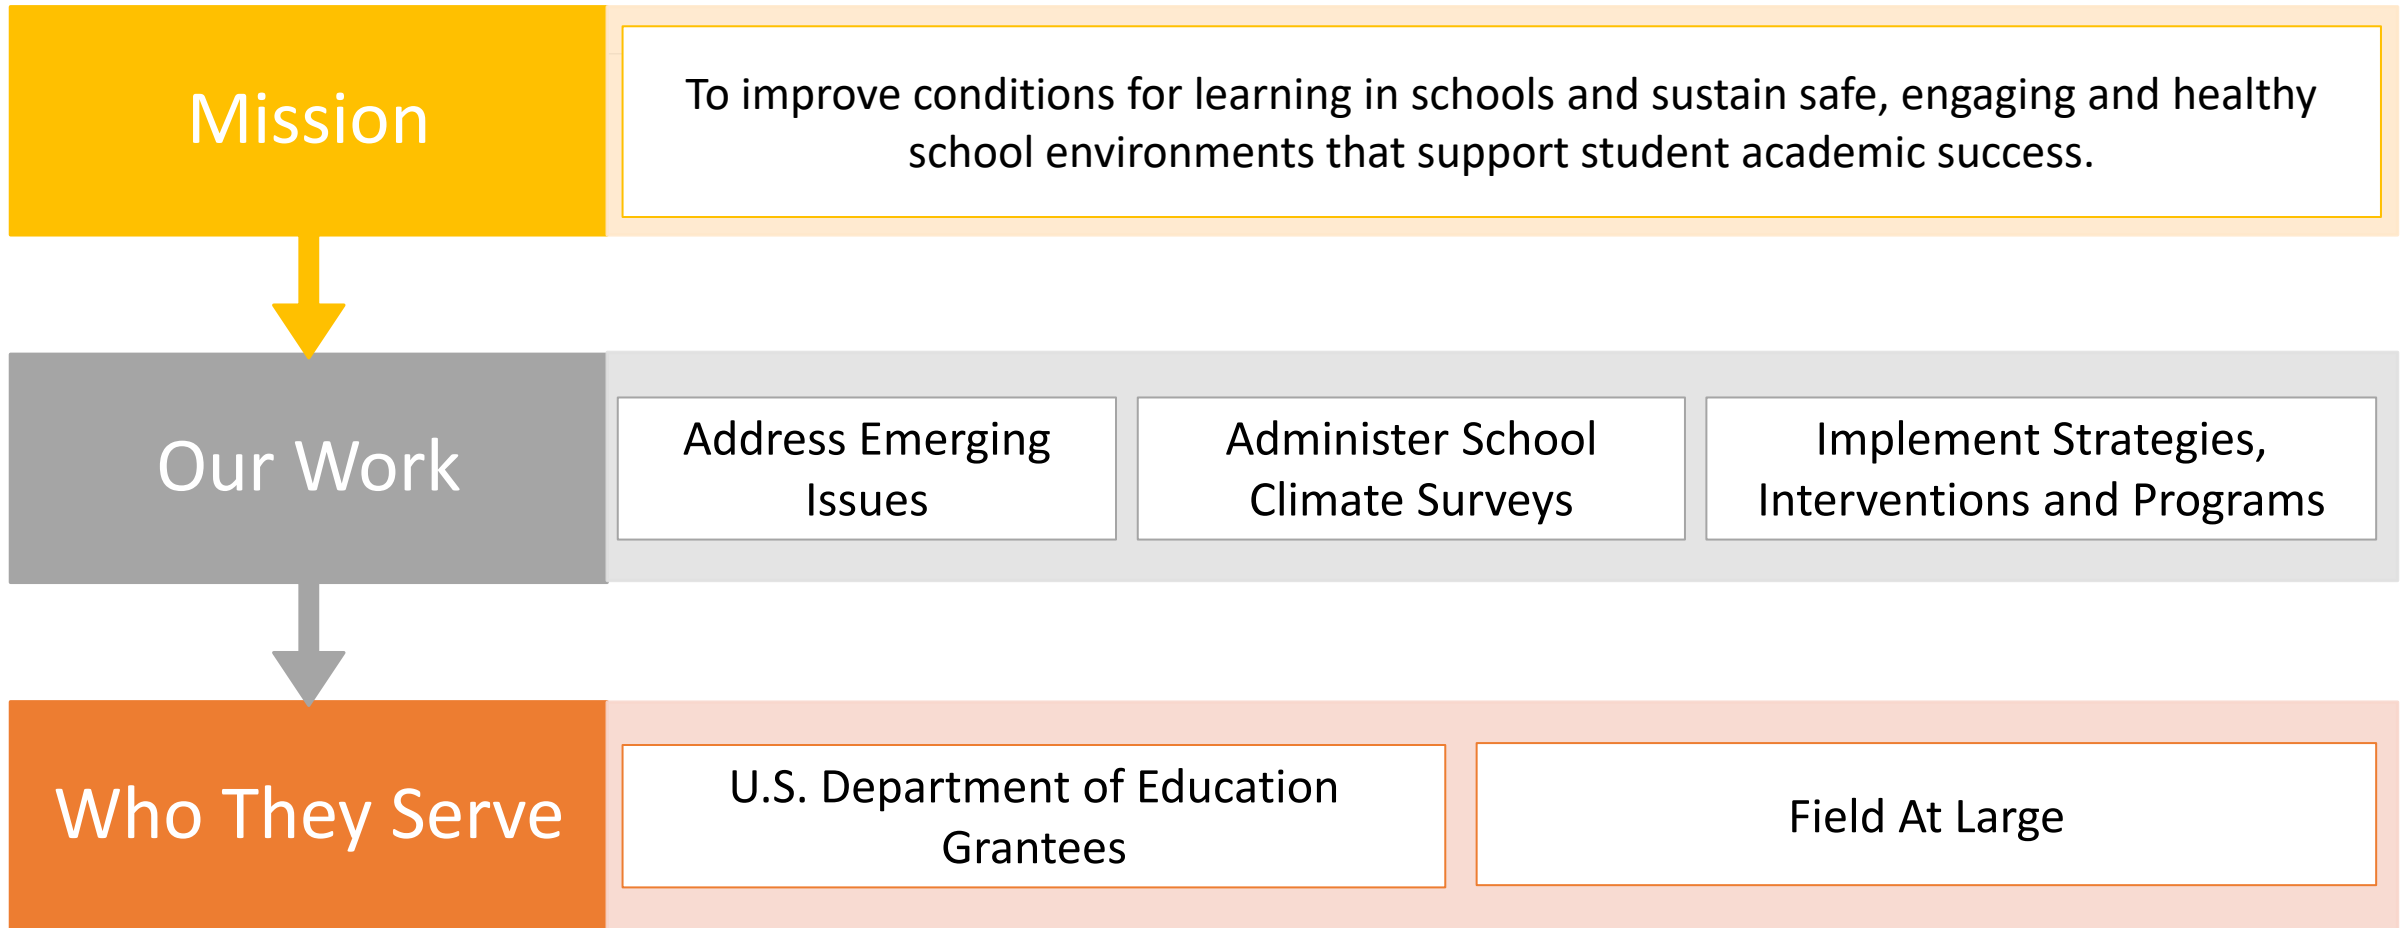

1. The NCSSLE TA Center

Promoting mental wellbeing and healthy relationships with social media

Center of Excellence on Social Media and Youth Mental Health

Julia Matakis, MPH, PCC

Senior Manager, Mental Health Programs

August 17, 2023

AAP Center of Excellence on Social Media and Youth Mental Health

Background

- Fall 2022, AAP was awarded \$10 million over five years from the U.S. Department of Health and Human Services (HHS), through the Substance Abuse and Mental Health Services Administration (SAMHSA), to establish a **National Center of Excellence on Social Media and Mental Wellness**.
- The Center will serve as a centralized, **trusted source** of evidence and support for children and teens, parents, educators, pediatricians and other professionals who help youth navigate social media.

Primary Aims

The AAP Center of Excellence on Social Media and Youth Mental Health has **three** main goals:

- 1. Improve pediatric mental wellbeing** by reducing the risks and leveraging the benefits of social media
- 2. Build the capacity** of individuals who work with youth to mitigate social media's impact on mental wellbeing and promote healthy social media use
- 3. Synthesize and promote the evidence** base and best practices for healthy social media use via communication, guidance, and other resources

Megan Moreno, MD, MEd, MPH, FAAP

Professor and Interim Chair, Department of Pediatrics
University of Wisconsin

Jenny Radesky, MD, FAAP

Assistant Professor of Pediatrics & Developmental and Behavioral
Pediatrician, University of Michigan Medical School

American Academy
of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN®

Media use in school-aged children and adolescents: Benefits

- Exposure to new ideas and information
- Interaction: promoting community participation and civic engagement
- Collaboration on projects and school assignments
- Connection to family and friends geographically separated
- Access to support networks

Media use in school-aged children and adolescents: Risks

- Overweight and obesity
- Sleep
- Problematic internet use/video gaming addiction
- Multitasking
- Exposure to risky content
- Tech-specific risks: cyberbullying, sexting, online solicitation

What we know about social media and youth mental health

- May not be linear relationship (U shaped curve)
 - Effects are multifactorial and depend on:
 - Type of media
 - Type of use
 - Amount and extent of use
 - Characteristics of the individual child
- Related to parent media use

The Current Narrative

Understanding context

“I’m so addicted” “Phones are bad” “Social media is evil”

This narrative may be adding to poor mental health

A previous study compared news stories about bullying:

- Fear-based writing: sadness, hopelessness, anger
- Public health oriented writing: hopeful, curious

By Dr. Nicholas Kardaras

September 17, 2022 | 8:11am | Updated

Seeking validation from mental-illness groups on social media has created a youth epidemic of “Digital Social Contagions,” with alarming rates of addiction, depression, suicide and gender dysphoria.

A New Narrative

Making words matter

- **Emphasize children's innate resilience** and unique characteristics that are developmentally adaptive (e.g., curiosity, attracted to novelty, seeking peer reactions) but don't always interact well with the adult-built environments around them.
- **Recognize that we need to act now** to help youth through the mental health crisis (and prevent mental health problems in younger children), but avoids reinforcing the dominant polarized discourse (e.g., only blaming technology).
- **Create and amplify resources and interventions** that are multi-level, involve all stakeholders and relationships children have, addresses the psychological and sociological factors that shape media use and how children react to it.

Center of Excellence Framework

Concepts to Remember

1. **Centering on the child/adolescent:** Help youth and caregivers provide support for autonomy, agency, advancing skills in digital citizenship and literacy, support self-regulation, and parental role modeling and open-minded conversation
2. **Developmental lens:** Provide resources to support healthy relationships with technology from infancy, focusing on important emotional and relational processes that can be hindered or supported with technology
3. **Importance of context:** Support balanced parent technology use; affirm what the family is already doing to help the child's mental health, academic wellbeing, and connection to community; understand sociocultural drivers of media use
4. **Individual differences:** Tailor approaches to the strengths and challenges of each child/family
5. **Digital ecosystem design:** Advocate for policy change. Metrics of platform success (e.g., engagement) may be at odds with metrics of child wellbeing (sleep, homework completion/focus)

Implications for Schools

Exploring Frameworks & Resources

Cyber bullying, Digital Citizenship Programs

Digital Citizenship program considerations: Adolescent Digital Media Use and Mental Health by Weinstein and James (2022): [Chapter 15: School-Based Initiatives Promoting Digital Citizenship and Health Digital Media Use](#) (see page 369 for table with overview of programs)

Avoid curricula:

1. Using the language of “addiction” to characterize everyday media habits.
2. Describing a causal relationship between media activities and mental health issues (e.g., depression, anxiety, suicide risk).
3. Emphasizing total screen time without any attention to the types of digital activities that comprise that time.
4. Including potentially problematic messages and examples of simplistic and likely ineffective instructional approaches (e.g., just telling all students “Don’t compare yourself to others on social media”).
5. Lessons with a clear implication that offline activities are inherently more worthwhile than any online activities.

Activities and Resources

Question & Answer Portal

Ask the Experts

- **Interactive Q&A Portal:** a two-way communication channel that allows clinicians, educators, parents/families, youth, and others to submit questions about social media and mental well-being
- Our CoE team, including our Co-Medical Directors, **review all questions** and develop prompt evidence-based responses that will be emailed to users
- **Searchable by age** and includes all previously asked questions and responses made to date
- Questions so far range in topic from school policies on digital devices to how to support young children's behavior related to digital media to how to support teens expressing body image concerns

Get Your Questions Answered on Social Media and Youth Mental Health

Whether you're a parent seeking guidance about your child's relationship with technology, an educator in search of resources for your students or a physician navigating how to support your patients' mental health as social media becomes more of a prevalent force in their lives, our expert staff and physicians can help.

Ongoing Center Activities:

- **Youth Advisory Panel (YAP)** members serve as partners in resource and content development. This 20-member panel is being selected from among 1800 diverse applicants and will have their first convening in September 2023.
- **Share educational resources**, including a webinar series, **tip sheets**, and a glossary of media platforms.
- **Launch virtual interactive learning communities** aimed at clinicians, educators, policy makers, and parents/families, leveraging Project ECHO (Extension for Community Healthcare Outcomes). Our first ECHOs will launch in fall 2023

Social media can...

help connect.

CENTER OF EXCELLENCE
Social Media and
Youth Mental Health
FROM THE AMERICAN ACADEMY OF PEDIATRICS

RESEARCH-BASED TIPS FROM PEDIATRICIANS FOR FAMILIES

When it comes to helping your children build healthy digital habits, you may not know where to start. Here are some small steps that can make a big difference for your family:

1. Build a family media plan.

- Work together to set rules about social media use so you and your children agree on how devices fit into your lives.

2. Balance time with and without devices.

- Create screen-free times and places in your home (e.g., meals, bedtime).
- Set do-not-disturb times and media time limits.
- Track online activities and talk about which ones may be problematic.
- Plan regular screen-free activities your family enjoys.
- Make a habit of turning off media that isn't in use. Try music if you need ambient noise.

3. Talk about social media.

- Start regular, open-minded conversations with your children (even the youngest ones!) about their media use, and yours.

4. Set a good example.

- Include your own habits in discussions about social media usage.
- When your attention is on your device, tell your kids what you're doing.
- Be kind to others online and talk to your kids about how you are using media for good.

5. Optimize your family's online experience.

- Choose quality content to use together as a family.
- Know which platforms are age- and content-appropriate for your children.
- Set and follow safety rules for who we can chat with online.
- Set privacy settings at the most secure level.
- Watch for warning signs, like if your child is:
 - » Withdrawing from social interaction and hobbies.
